

# Medical Eye Exams and Services

Patient's Name: \_\_\_\_\_ Date of Birth: \_\_\_\_\_

Your vision and the health of your eyes are very important. Eye disease can occur without any symptoms, and because of this Hawks Prairie Vision Clinic recommends regularly scheduled eye exams for all patients. Healthy eyes require a Routine Vision Exam (Annual Preventive Exam) every year. This exam will screen for eye disease and provide measurements for glasses and/or contact lenses. If the chief complaint or primary reason for the visit(s) is due to a medical situation such as **dry eyes, diabetes, floaters, cataracts, burning, itching of the eye, infection, eye pain, or any other medically related condition**, the result may be billed towards **MEDICAL** insurance, NOT vision insurance. If the doctor suspects or is managing disease, he/she may order additional tests that may also be billed to **MEDICAL** insurance. This may include **DIGITAL** photography. VISION insurance does not cover these services.

Depending on your policy, visits may be subject to a deductible, copay, and/or co-insurance. This is an agreement made between patient and insurance. Hawks Prairie Vision Clinic does not set these terms. It is ultimately the patient's responsibility to understand their coverage.

***In the event insurance does not pay for the visit(s), the patient is ultimately responsible for ALL charges.***
